Actions Taken

Church/program has adapted the Conference's snow/ice treatment/removal plan to its location. See www.susumc.org/workplace-safety, click on Resources/Forms

Access is limited to entryways that are cleared of snow/ice.

Umbrella racks/bags/checkrooms are used to keep wet umbrellas from dripping on walking surfaces.

Procedures are in place to promptly dry wet areas (clean up immediately, place caution signs, etc.).

Absorbent floor mats are used on entryway surfaces during inclement weather and lie flat.

Absorbent mats are at least 12 feet in length.

Mats are changed frequently during inclement weather (replacement mats are available).

Sand and ice melt or other abrasive products are available for parking lots and sidewalks.

Sand and ice melt are strategically placed for easy access.

Snow remove of lot/walks is finished before employees and visitors arrive/leave.
