Date:

Enter "x" under the Yes or No column for the following items:

Routine walk-throughs of kitchen/dining areas are made to address slip/trip/fall hazards.

Yes

No

Actions Taken

Floors are free from grease, puddles, debris.

Floor near sinks is provided with a non-slip finish.

Kitchen floor mats are slip-resistant, lay flat, are in good condition, and placed where needed.

Employees wear shoes with low heels and slip-resistant soles.

Wet floor signs are available (3-4' are best; don't use the low, "tented" signs as they tend to fall).

A sufficient number of trash receptacles are strategically located to prevent overflow.

Trash receptacles are emptied throughout the day.
