

Volunteers In Mission Opportunities

CHECK OUT THE GUIDELINES AND VIRTUAL MISSION OPPORTUNITY BELOW

“Give Ye Them To Eat” An Integrated

Development Program

Mark 6:37

Dear Friends and Churches,

October 1, 2020 (**upcoming virtual trip in NOVEMBER**)

Warm greetings from Give Ye Them to Eat (GYTTE) and missionaries Nan and Miguel. There is more recent news on GYTTE after the information on the next Mission Journey.

We would like to invite you to participate in the next Virtual Mission Journey to GYTTE. Online, through a zoom experience, you will get to know GYTTE and be able to see what an in-person mission experience is like. It requires that you download zoom to your computer. This virtual mission journey requires about an 8-hour commitment on zoom over two weeks. We have facilitated 5 mission journeys since May and the feedback is very positive.

The upcoming trip in November includes two 1-hour team preparation sessions; then three mission trip sessions of two hours each; and an hour of reading before each trip day. The dates are: 1-hour Team meetings: Wed. Nov. 4 and Fri. Nov. 6, at 11am eastern time. Then three 2-hr. mission trip days: Mon. Nov. 9, Wed. Nov. 11 and Friday, Nov. 13, all at 11am EST. Through this trip you will be with missionaries Nan and Miguel and begin to get to know 4 of GYTTE's staff and learn about six development programs in rural Mexico. Our Virtual tour will include photo/description shows including Educational Tourism, Rural Reality, Community Development, Construction/Appropriate Technology, Agricultural and Livestock Development, Community Health/Training of Health Promoters, Church and Faith Development and AWARE (Alternative Work-Study and Reality Experience).

We will also study themes related to the historic relationship between the United States and Mexico like NAFTA and the root causes of migration of people from Mexico and Central America to the US. We will do the short readings on our own. In the 3 zoom mission sessions, we will go to small breakout groups to discuss a question, then share briefly in plenary. The small groups are fun!

If you would like to go on this Mission Journey to Mexico with GYTTE please respond to me at nanmigl@yahoo.com and to Rev. Marian

Hartman, mhartman@susumc.org, who will be the facilitator of the mission journey.

Last month our staff at the Tree of Life Training Center gave a five-day workshop in a nearby town about how to build a Palapa, which is an open-air building with a roof made of palm leaves. It is very cool. You can also put walls around it. This Palapa will be used for community meetings. Palapa's are an ancient indigenous construction technique.

We also planted 50 Moringa trees this year which is medicinal and used for diabetes control. We just harvested the corn, leaving much of the corn with the stalks which will be ground to feed the animals. At the same time they planted new corn which probably won't develop too far but will serve as feed. The peanuts and watermelon will be ready soon. We will harvest the squash (like a pumpkin but not as orange) in November and December. We are also planting pitaya – a form of passion fruit. It is a cactus and you plant it usually on trees

or tree

trunks. We have a number of citrus trees that give a lot during rainy season, different forms of bananas and papaya.

We have had good rains this year but that also means growth of a lot of weeds and worsening of roads so our staff are doing lots of cleaning out of weeds and also road repair in and around the Center.

The pregnant goats and sheep are well and will begin having their babies the end of October. We have chickens at every possible stage of development: 2 sitting on eggs and various chicks at different ages. Currently only 6 chickens are laying eggs. All of our animals are raised without chemicals and the chickens are free during the day and in a large pen at night. Eggs from well-treated chickens are so much healthier for you.

We hope you will join us at GYTTE! Please encourage someone else from your church to join the virtual mission journey. Thank you for considering getting to know GYTTE.

In God's love,

Nan and Miguel

"Give Ye Them To Eat" No. 07629A, An Advance Special Program Of The United
Methodist Church

Revised September 1, 2020

[UPDATED - Guidelines for Project Sites and Team Leaders During COVID-19](#)

Guidelines for US Project Sites and Team Leaders during COVID-19

June 2020 (rev. September 2020)

Our first General Rule as United Methodists is to "do no harm." This extends to our mission relationships. We want to "do no harm" to our volunteers or the ones they serve. Our goal as United Methodist Volunteers In Mission is to minimize COVID-19 infections spread by United Methodist activity.

The United Methodist Volunteers in Mission leadership understands that many project sites rely on teams to assist in serving the community. These teams may come from nearby, from another state, sometimes from another country. Each individual situation will be different. Some local mission partners or missionaries may have contracted and already recovered from COVID-19. Some may be carriers. Some are not infected. Some live with family members who are immunocompromised. All want to serve. Yet one of the worst unintended effects of mission work throughout the ages has been the spread of infectious disease. Remember that we bring other things with us when we bring the Gospel. We must be careful.

The federal disaster declaration includes every state and territory with most states presenting shelter-in-place and social distancing guidelines. These guidelines are designed to assist teams and hosts in determining when and how to prepare the site for future teams. All sites should adhere to public health and safety protocols in order to protect employees, homeowners, and missionaries.

For the latest updates in regard to COVID-19, please visit - [Centers for Disease Control](#).

Responsibility for adhering to these guidelines is shared by the Team Leader and the Project Site. This requires frequent communication and cooperation between both parties.

General Guidance for International Service

The State Department issues travel advisories based on health and safety concerns. Travel to countries at a [Level 4 travel advisory](#) is prohibited. Team insurance is not available for mission service in these countries.

Travelers may be required to quarantine before or after travel to countries with advisories at Level 3 and below.

General Guidance for US Project Service

Based on [CDC guidelines](#)

- **Suspending teams**

- Make this decision based on the guidance of your governor, bishop, and your state, county, and local health departments. Pay attention to directions about school closure, stay-at-home orders, and the size of gatherings that are allowed.
- Make this decision with the guidance of your board of directors or other governing body.

- **Hosting teams**

- Know the quarantine rules. Some states require travelers to quarantine before or after arrival. Have a plan to ensure compliance.
- Follow CDC guidance on cleaning and disinfecting your facilities. <https://www.cdc.gov/coronavirus/2019-ncov/community/disinfecting-building-facility.html>
- Post reminders for hand washing, awareness of symptoms, etc.
- Improve air circulation in all common areas.
- Provide prevention supplies:

- hand sanitizer
 - disposable facemasks
 - eye protection
 - cleaners and disinfectants
 - Gloves for food preparation and cleaning
- Other considerations
 - Avoid buffet-style meal service. Have kitchen crews prepare dishes. This includes sack lunch preparation.
 - If the dishwasher does not meet standards for sanitation, consider asking teams to bring paper products (not Styrofoam) to be discarded after each meal. Provide adequate trash receptacles.
 - All touch surfaces should be thoroughly wiped down when the team arrives and as they prepare to leave with approved cleaners. <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2-covid-19>
 - Work should be done on exterior projects only. Make accommodations for portapotties so teams do not have to enter a home.
 - Consider ways to assure safe distancing on the work sight, in the dorm, dining area, and meeting space.
 - If possible, provide washer and dryer facilities for laundering expectations.
- Screening protocol on arrival
 - Take temperature
 - Ask about general health
 - Ask if missionary has been in contact with anyone who had COVID-19
- Wipe down all surfaces prior to welcoming teams.
 - Arrange for outdoor projects to assure minimal contact between homeowner and team members (painting, deck or ramp building, landscaping, roofing). Make accommodations for rest room facilities so team members do not have to enter the home. (i.e.: portapotties)
 - Childrens' ministry (VBS) should be suspended until more guidance from CDC and the local officials is available.

- Have a plan in place to safely transport a team member who develops symptoms of COVID-19.
 - Provide space for isolation if someone reports symptoms.
 - The team member exhibiting symptoms should contact his/her health care provider as soon as possible.

- **Leading Teams**
 - Follow the guidelines of the CDC for travel both inside and outside the U.S.
 - Follow your local guidelines from municipal, county, and state health authorities. Also make sure you know the local guidelines in the place where you intend to serve. Where guidance from different authorities conflict, follow the more restrictive protocols.
 - If it is determined that it is safe and lawful to serve, continue to make arrangements for proper social distancing and PPE for team members, and sanitize surfaces and equipment wherever you go.
 - Each team member will sign the [Medical and Emergency Form](#).
 - Know the health infrastructure in the area where the team intends to serve and the location of the nearest hospital.
 - Have a plan for canceling the journey or sending team members home if any team members are uncomfortable with the enforcement of safety protocols.
 - Consider donations to the partner organization and organizing a virtual mission if it is not appropriate to physically travel to the project site.

Going “back to normal” may be a long way off. We expect to take measures to interrupt transmission of the virus until (1) antibodies are proven to protect against re-infection, (2) tests are widely available to the general public and all team members have recently tested negative, or (3) there is a vaccine available and all team members have been vaccinated.
